

RollupBandit. *The roll-up, done right.*

The golf organiser app for weekly roll-ups, swindles, golf societies, leagues, tournament weekends, Stableford competitions, team matchplay and knockouts — built for the golfer who runs the day.

Only one organiser needs the app. Everyone else simply plays golf.

THE APPROACH

RollupBandit deliberately avoids compulsory player accounts and phone-based scoring. Golfers play normally; the organiser records the completed cards, confirms prizes and side games, and shares one definitive result. Everything the organiser normally manages across cards, spreadsheets and WhatsApp is brought into one clear workflow.

Audience: the golfer who organises the group — roll-up and swindle organisers, society captains and golf-trip hosts. Built independently in Kent through [Katana Software Limited](#).
